

1

METHOD FOR PROCESSING A DATA PACKET

2

ABSTRACT

3

The invention is directed to methods, apparatus and systems for processing a data packet

4

that has a destination address. In the event that in a routing table cache and in a routing

5

table, there is no entry with a destination address prefix that is a prefix of the destination

6

address, a default-route-prefix is determined in a default-route determination step.
